- If we are unable to successfully implement our proposed expansion plans; our results of operations and financial condition could be adversely affected.**

Our Company is planning to build scale and expand its production capacity by installing plant and machineries at our existing facility situated at (1) 3/12/82 & 83, Karkuddy, Therkkumedu, Kesavapuram, Shencottah, Tirunelveli – 627813, Tamil Nadu, India for Rigid PVC Electrical Conduits; and (2) TP/XIII/707&708, Papanoor Road, Edamon, Kollam – 691307, Kerala, India for HDPE Pipes. From the Net Proceeds of the Issue, we will be deploying funds for purchase of additional plant and machinery. These expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans. Further, there can be no assurance that we will be able to execute our strategies on time and within the budget estimated by the Company. In addition, our expansion plans have not been appraised by any independent or third-party agency, and accordingly, in the absence of such independent appraisal, our expansion plans may be subject to change based on various factors which are beyond our control.

3. *Our Company is yet to place orders for the machinery for the expansion of the Manufacturing Facility. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.*

Our Company has received third party quotations for the machinery proposed to be installed at our Manufacturing Facility situated at (1) 3/12/82 & 83, Karkuddy, Therkkumedu, Kesavapuram, Shencottah, Tirunelveli – 627813, Tamil Nadu, India for Rigid PVC Electrical Conduits; and (2) TP/XIII/707&708, Papannoor Road, Edamon, Kollam – 691307, Kerala, India for HDPE Pipes. Although, we have identified the type of machinery proposed to be purchased from the Net Proceeds, we are yet to place orders for the proposed machinery amounting to ₹ 552.64 lakhs. The cost of the proposed purchase of machinery is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 82 of this Prospectus.

We cannot assure that we will be able to procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of the Manufacturing Facility. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

4. *The availability of look-alikes, counterfeit products, primarily in our domestic markets, manufactured by other companies and passed off as our products, could adversely affect our goodwill and results of operations.*

We are exposed to the risk that certain entities in India where our products are marketed, could pass off their products as ours to create look alike and counterfeit products. For example, certain entities could create spurious and pirated products. The measures we take to protect our brands and other intellectual property include relying on Indian laws and initiating legal proceedings, may not be adequate to prevent unauthorised use of them by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving and could involve substantial risks to us. Detecting and protecting against the unauthorised use of our products, technology and proprietary rights is expensive, difficult and, in some cases, impossible. The proliferation of unauthorised copies of our products, and the time lost in defending claims and complaints about spurious products could decrease the revenue we receive from our products and have a material adverse effect on our reputation, business, financial condition and results of operations.

5. *Our revenue is dependent on single business segment i.e. PVC Pipe & Electrical Conduit. An inability to anticipate or adapt to evolving upgradation of these products or inability to ensure product quality or reduction in the demand of these products may adversely impact our revenue from operations and growth prospects*

Our revenue is dependent on single business segment i.e. PVC based Pipes and Electrical Conduits. For the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, PVC Pipe accounted for approximately 22.75%, 24.48% and 27.46% respectively and Electrical Conduits accounted for approximately 70.27%, 69.64% and 65.75% respectively of our revenue from operations. Our continued reliance on single business segment for substantial portion of our revenue exposes us to risks, including but not limited to, reduction in the demand of the products in the particular segment in the future; increased competition from regional and national players; the invention of superior and cost-effective technology; fluctuations in the price and availability of the raw materials; changes in regulations and import duties and the general economic conditions. Any occurrences of such event could significantly reduce our revenues, thereby materially adversely affecting our results of operations and financial condition.

6. *Our Company maintains high level of inventory for uninterrupted production activities.*

Our inventory for the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 were ₹ 761.63 lakhs, ₹ 669.19 lakhs and ₹ 622.47 lakhs respectively. While our Revenue from Operations during the Fiscal 2023-24 was ₹ 4,619.13 Lakhs implying an inventory turnover ratio of 6.46. Our requirement of maintaining inventory is high when compared to our peers in the same industry. Maintaining such high level of inventory requires extensive investments in working capital and strains our financial resources. Further, stocking high inventory may also lead to risks of scrapping of raw material, decay due to time, wear and tear. While we believe, we do maintain optimum level of inventory in consideration to our production level, our major portion of inventory is towards stocking of Raw Material and Finished Goods. We continue to assess and maintain inventory level strategically giving importance to both operational and financial performance.

The results of operations of our business are also dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has miscalculated expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases or create additional vendor financing, which could have an adverse impact on our income and cash flows.

7. *Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customers would have a material effect on our business operations and profitability.*

Substantial portion of the Company's revenues has been dependent upon a few customers. For the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, our top ten customers accounted for approximately 60.24%, 54.44% and 51.79% of our revenue from operations. However, the loss of any significant customer would have a material effect on our financial results.

Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. However, in case of any change in the buying pattern of our end users or disassociation of major customers can adversely affect our business or if our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Further, loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

8. *The company's business is dependent on certain suppliers and the loss of one or more of them would have a material adverse effect on the business.*

Our Company has been majorly dependent upon a single supplier which contributes almost 86.71% of total raw material purchases for the financial year ended March 31, 2024. Our inability to obtain raw material in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability. We depend on a number of suppliers, for procurement of raw materials required for manufacturing our products. For the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, top ten suppliers accounted for 99.12%, 97.32% and 98.33% of our total purchases respectively. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Inadequate and timely unavailability substandard quality of the raw materials used in the manufacture of our products, could have a material adverse effect our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers,

which may cause them to cater to our competitors alongside. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

9. *Our Restated Financial Statements are prepared and signed by the Peer Review Auditor who is not Statutory Auditors of our Company as required under the provisions of ICDR.*

The Restated Financial Statements of our Company for the financial year ended March 31 2024, 2023 and 2022 respectively are prepared and signed by M/s N. S. Sarma Associates, Chartered Accountants, the Peer Review Auditor of our Company who is not statutory auditor of our Company.

10. *Our Company had incurred loss in one of the last three financial year. Any losses in future could adversely impact our business, financial condition and results of operations.*

Our company has suffered loss in the financial year 2021-22 as per restated financial statement. The profit/(loss) of the company for last 3 financial years is summarized below.

Particulars	<i>₹ in lakhs</i>		
	31-03-2024	31-03-2023	31-03-2022
Profit before Tax	144.66	123.58	(52.91)
Profit after Tax	142.48	120.27	(40.71)

Any failure to sustain or increase our net revenue sufficiently to keep pace with our expenses could prevent us from achieving profitability on a consistent basis in future periods.

11. *Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.*

The success of our operations depends on a variety of factors, including our ability to source raw materials at competitive prices. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including demand and supply, general economic and political conditions, transportation and labour costs, natural disasters, pandemic, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use.

We seek to source our raw materials from our suppliers and typically seek quotations from multiple suppliers. We may be required to track the supply demand dynamics and regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices or foreign currency fluctuations. Further, we procure a large portion of our raw materials from a few suppliers, any disruption of supply of raw materials from such suppliers could adversely impact our operations and business if we are unable to replace such suppliers in a timely manner. However, we have not entered into any definitive agreements with any of our suppliers. We cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability. We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price. Additionally, there can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials.

If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

For further details about business of our Company, please refer chapter titled **“Our Business”** beginning on Page 111 of this Prospectus.

- 12. We operate in a price sensitive industry wherein the purchasing decisions of consumers are highly influenced by the product price. Our inability to continue to offer our products at competitive prices may adversely affect our business, results of operations and financial condition.**

We operate in PVC Pipe industry wherein the purchasing decisions of consumers are highly influenced by the product price. We may not always be able to offer our products at price points which represent value for money and is competitive in the market. Accordingly, PVC Pipe companies like us need to be able to reduce the operating costs in order to maintain profitability while maintaining rigorous quality standards. Our distributors, dealers and direct customers also negotiate for monetary benefits as the volume of their sales increase. Our ability to maintain and enhance our competitiveness through our competitive pricing strategy will have a direct effect on our business, financial condition and results of operations. There can be no assurance that price hikes will not take place in the future. If we are unable to maintain our pricing competitiveness and are not able to effectively respond to competition from existing manufacturers and prospective entrants and consequent pricing pressures our business, financial condition and results of operations can be adversely affected.

- 13. We face competition, including from other large and established competitors, and we may fail to compete successfully against existing or new competitors, which may reduce the demand for our Products which may lead to reduced prices, operating margins, profits and further result in decline in revenue.**

We face increasing competition from our existing and potential competitors in India and in overseas markets that may have substantially greater brand recognition, longer operating histories, greater financial, product development, sales, marketing, more experienced management, access to a cheaper cost of capital and other resources than we do. Our competitors may have lower costs, or be able to offer lower prices and a larger variety of products in order to gain market share. Our competitors may also make acquisitions or establish cooperative or other strategic relationships, among themselves or with third parties, including distributors, dealers and direct customers of our products, thereby increasing their ability to address the needs of our targeted customers and offering lower cost products than we do which may have a negative effect on our sales. Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. Further, if the Government reduces the import duty on PVC profile in India, we may face increased competition from international players, which may have higher appeal to consumers in terms of variety and pricing. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively.

Competition in our industry is based on a range of factors including pricing, marketing, delivery time, payment terms etc. To remain competitive, we must continue to invest significant resources in capital expenditure, research and development, sales and marketing and customer support. There can be no assurance that we shall have sufficient resources to make these investments or that we shall be able to make the technological advances necessary to be competitive. In case we fail to effectively compete, including any delays in responding to changes in the industry and the market, we may also have to incur additional costs and expenses to conduct marketing campaigns, market research and investing in newer technologies and infrastructure to effectively compete. Increased competition could result in, amongst other things, a slowdown in the growth of our corporate accounts, a loss of our market share, price reductions, reduced demand for our Products, reductions in revenue and reduced margins and profitability.

Further, we may be subject to risk of consolidation amongst our competitors who may leverage their financial strength and market dominance to secure financing at competitive terms. Such a consolidation shall enable these market players to take aggressive steps, including but not limited to, making additional acquisitions, investing more aggressively in product development and capacity and displacing demand for our Products. The market in which we operate is fragmented and in case there is a trend of consolidation in future, our business could be at a comparatively disadvantageous position and as a result our business, results of operations, financial condition and prospects could be materially and adversely affected.

- 14. We face competition from substitutes of our products and if consumers' preferences for any of these substitutes increases it could lead to a reduction in the demand for our products, which could have a material adverse effect on our business, financial condition and results of operations.**

In addition to competition from players in the PVC Pipe industry, we also face competition from substitutes for many of our products. For instance, the pipes are made up from uPVC, CPVC or PPR Pipes. Increases in consumers' preferences for any of these substitutes could lead to a reduction in the demand for our products, which could have a material adverse effect on our business, financial condition and results of operations. Customer preferences in the

markets we operate are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage.

15. *There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies.*

There are certain discrepancies/errors noticed in some of our corporate records in the past and certain instances of delays/incorrect filings in the past with certain statutory authorities.

- In one of the attachments of Form-2, inadvertently the share premium has been mentioned as ‘Nil’ in Table-A of list of allottees attached with Form-2 for allotment of 40,000 shares at a price of ₹ 20/- per share on July 17, 2013. However, Form-2 filed with ROC correctly mentions the share premium amount.
- In one of the attachments of Form-2, inadvertently the share premium has been mentioned as ‘Nil’ in Table-A of list of allottees attached with Form-2 for allotment of 95,000 shares at a price of ₹ 20/- per share on November 20, 2013. However, Form-2 filed with ROC correctly mentions the share premium amount.

Further, in the past, there may have been some instances of incorrect filings or delays in filing statutory forms and returns with the ROC. The instances mentioned pertain to inadvertent errors at the time of filing. It is pertinent to note here that all the forms are approved by ROC. If any penalty or action initiated by ROC/any regulatory authority in future, our company shall abide by the order of such regulatory authority which could impact financial position of the company.

16. *Demand for our products is closely tied to the levels of residential and non-residential construction activity in India. Any reduction in the activity in one or both of these markets could have a material adverse effect on our business, results of operations and financial condition.*

Our business is heavily dependent on the performance and market trends of the construction & real estate sector (residential and non-residential) in India. Our PVC based pipes and electrical conduits find application in plumbing and electrical wiring, which is directly related to construction and real estate segment. The real estate and construction sector may be affected by various factors outside our control, including prevailing general economic and market conditions, changes in the applicable governmental regulations, demographic trends, employment and income levels and interest rates, among other factors. In the event of any downturn or cyclical fluctuation in the construction sector affecting the demand of PVC based Pipes and electrical conduits or any developments that make our products less economically beneficial, could have an adverse impact on our business, financial condition and results of operations.

17. *We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.*

Given the nature of our products and the sector in which we operate, our customers have high and exacting standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects in the products manufactured by our Company or failure to comply with the technical specifications regarding the raw material composition may lead to cancellation of the orders placed by our customers. Further, any failure to make timely deliveries of products in the desired quantity as per our customers’ requirements could also result in the cancellation of orders placed by our customers, product liability claims and may adversely affect our reputation and goodwill. In addition, our customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, cash flows, results of operations and financial condition.

18. *Our continued operations at our manufacturing facilities are critical to our business and any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facility, may have a material adverse effect on our business, results of operations, financial condition and cash flows.*

Our manufacturing facilities are subject to operating risks, such as breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity boards. In case, the supply is not available for any reason, our production schedule may be hampered. Further, our customer relationship, business and financial results

may be materially adversely affected by any disruption of manufacturing operations of our products, including as a result of any of the factors mentioned above.

19. *Any failure on our part to effectively manage our inventory may result in an adverse effect on our business, revenue from manufacturing operations and financial condition.*

We are a manufacturing company, and, at all points of time, a certain portion of our assets comprises of an inventory of raw materials, work in progress products and finished products. Maintaining sufficient inventory of raw materials is critical for our operations including as a buffer against any supply disruptions. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of business and increase the costs of our operations.

In the event we overestimate our requirements for raw materials as compared to the demand for our products, it may lead to situations that require us to block more capital and increase our operating costs in connection with inventories and further expose us to variations in raw materials risk. Equally, if we underestimate our requirements for raw materials, it may adversely affect our ability to manufacture the required quantity of products for our customers' requirements in a timely and cost-efficient manner which may lead to loss of business and / or the opportunity to service customers which could adversely affect our business, results of operations and financial condition. Further, we may also lose opportunities to acquire raw materials in a cost-effective manner, thereby increasing costs of operations and adversely affecting our working capital requirements.

Additionally, if our inventory of finished products is not dispatched on time or if there is any unanticipated delay in the delivery of our finished products or if the finished products are not properly maintained or are damaged or destroyed, we could lose such inventory which could have an adverse impact on our production cycle, results of operation and financial condition.

20. *Non-availability of initial period secretarial/statutory records of the company filed with ROC since incorporation.*

Since the company was incorporated on October 04, 1994, it is not possible to trace all secretarial records since incorporation. We are unable to trace copies of certain records. However, we have taken the data from registers & minutes maintained by the Company and also from the ROC search report obtained from Hemalatha & Associates, the Practicing Company Secretary. We cannot assure you that the filings were made in a timely manner and that we shall not be subject to any penalty imposed by the regulatory authorities in this respect.

21. *Under-utilization of our manufacturing capacities and an inability to effectively utilize our existing manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*

As on the date of this Prospectus, we have four manufacturing facilities i.e. 3 (three) manufacturing facilities at Kerala and 1 (one) manufacturing facility at Tamil Nadu, which has a cumulative production capacity of 4320 MT for manufacturing of Rigid PVC Electrical Conduits and 1680 MT for manufacturing of uPVC Pipes. For further details about Installed Capacity and Capacity Utilization of our Company, please refer chapter titled "***Our Business***" beginning on Page 111 of this Prospectus.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

22. *As we continue to grow, we may not be able to effectively manage our growth and the increased complexity of our business, which could negatively impact our brand and financial performance.*

Continued growth of our business and user base requires us to expand our product portfolio, strengthen our brand recognition, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies, secure more space for our expanding workforce, and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial

relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. If we are not able to manage our growth or execute our strategies effectively, our expansion may not be successful and our business and prospects may be materially and adversely affected. We have experienced certain operating/ distribution/ manufacturing difficulties in the past in ramping up certain production/ delivery/ in a timely manner to meet the increasing demand and purchase orders from our customers. As we continue to expand, we may experience similar difficulties if we are unable to manage our growth, which may adversely affect our reputation and results of operations.

23. *Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.*

We carry our manufacturing operations from our unit located at Kerala and Tamil Nadu. Due to the geographical concentration of our manufacturing operations in these locations, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

In addition, we generate major domestic sales through our distributors, dealers and direct customers situated in Kerala. For the period ended March 31, 2024, we derived major portion of our revenue from the state of Kerala (i.e. 97.34%), followed by Karnataka (1.14%), Tamil Nadu (1.07%), Maharashtra (0.36%), Haryana (0.05%), Dadra and Nagar Haveli and Daman and Diu (0.04%), Delhi (0.01%) and Odisha (0.001%). Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

29. *We do not own the certain premises which we use for the purpose of our business operations.*

Certain premises used by our Company have been obtained on lease or rental basis, which includes our (1) Kannur Factory situated at 14/414E, Kooveri, Nadukani, Kannur - 670142, Kerala, (2) Punalur Factory situated at PMC/XIII/690, Punalur, Tholikode P.O., Kollam – 691333, Kerala, India and (3) Registered Office situated at Door No. XIII/690/ABC, Tholicode, Punalur, Kollam, Kerala- 691333, India. In the event that lease or rent agreement is not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable. If lease agreement is terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition, and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. For further information on our properties, see “*Our Business*” on page 111 of this Prospectus.

30. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customer’s discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Further, we operate in highly competitive markets in relation to our products where it is difficult to predict whether and when we will receive such awards. As a result, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when such orders are awarded to us and the commencement and progress of work under the orders placed. For further details of our business, please refer chapter titled “*Our Business*” beginning on Page 111 of this Prospectus.

31. *We have not entered into any long-term contracts with any of our clients.*

We do not have any long-term contracts with our clients and any change in the business pattern of our existing clients could adversely affect the business of our Company. As a result, our customers can terminate their relationships with us due to a change in preference or any other reason on immediate basis, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products and services. Our Company's customers have no obligation to work with us and may either cancel, reduce, or delay the business. The business by our Company's customers is dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products, customer’s inventory management, amongst others. Although we have satisfactory business relations with our clients and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability. Although, we have a strong emphasis on quality, timely delivery of our products and raw materials and personal interaction by the senior management with the customers and suppliers, any change in the buying pattern of buyers and preferences of suppliers can adversely affect the business and the profitability of our Company.

32. *Our Company is dependent on its Authorized Dealers/Distributors. The loss of any one or more of our major dealers would have a material effect on our business operations and profitability.*

As on the date of this Prospectus, our Company has 260 Authorized Dealers/Distributors present across 3 (three) states i.e. Kerala, Karnataka and Tamil Nadu and is completely dependent on the dealers/distributors. For the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, our top ten customers accounted for approximately 60.24%, 54.44% and 51.79% of our revenue from operations. However, the loss of any significant customer would have a material effect on our financial results.

Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. However, in case of any change in the buying pattern of our end users or disassociation of major customers can adversely affect our business or if our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Further, loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

33. *Our Company has significant portion of Property Plant and Equipment. Any destruction, breakdown, theft of our major plants or equipment or failures to repair or maintain the same may adversely affect our business, cash flows, financial condition and results of operations.*

One of the objects of Issue is to fund the purchase of capital equipment. We are planning to invest significantly on plant and machinery of latest technology and higher capacity and efficiency for our manufacturing facility. We own a large number of equipment and machinery used in our operations. To maintain our capability to undertake projects, we may have to purchase machines and equipment built with the latest technologies and knowhow. We cannot assure you that we will be immune from the associated operational risks such as the obsolescence of our plants or equipment, destruction, theft or major equipment breakdowns or failures to repair our major plants or equipment, which may result in their unavailability, project delays, cost overruns and even defaults in our order book.

The latest technologies used in newer models of equipment may improve productivity significantly and render our older equipment obsolete. Obsolescence, destruction, theft or breakdowns of our major plants or equipment may significantly increase our equipment purchase cost and the depreciation of our plants and equipment, as well as change the way our management estimates the useful life of our plants and equipment. We may have to incur high cost when our plants or equipment are not readily available from the market or requires services from original equipment manufacturers. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability of bulk discounts. Such replacement, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an adverse effect on our business, cash flows, financial condition and results of operations.

34. *We have not entered into any definitive agreements with our direct customers/dealers. If our dealers choose not to buy their products from us, our business, financial condition and results of operations may be adversely affected and our business are on purchase order basis with our customers.*

We have not entered into any definitive agreements with our dealers, and instead we majorly rely on past sales trend to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place, consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers vendor preferences. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. We do not have long-term contracts with our customers and there can be no assurance that we will continue to receive repeat orders from any of them, including our long-standing customers. There can be no assurance that they will be on the same terms, and the new terms may be less favourable to us than those under the present terms.

- 35. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations, cash flows and financial condition.***

We have engaged contract labourers for performance of certain functions at our manufacturing facilities. Although we do not engage these labourers directly, we are responsible for any wage and statutory payments to be made to such labourers in the event of default by such contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and our financial conditions. In addition, we may be liable for or exposed to litigations, sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

- 36. *The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.***

Our manufacturing processes requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non- compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further, since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power.

Any disruption / non-availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

- 37. *We may be unable to respond to changes in consumer demands and market trends in a timely manner.***

Our success depends on our ability to identify, originate and define product and market trends, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. Our advertising and marketing strategies must also appeal to a broad range of customers whose preferences may vary. We cannot assure you that the demand for our services with end-consumers will continue to grow or that we will be able to continue to develop appealing styles or meet rapidly changing consumer demands in the future. If we misjudge the market or fail to anticipate a shift in consumer preferences, we may be faced with a reduction in revenues. Any inability to respond to changes in consumer demands and market trends in a timely manner could have a material adverse effect on our business, financial condition and results of operations.

- 38. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.***

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

- 39. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products/services, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.***

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, meet the customer standards which in turn could adversely affect the value of our brand,

and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or services or any other unforeseen events could affect our reputation and our results from operations.

For further details in relation to our related party transactions, see **“Financial Statements as Restated - Related Party Transaction”** beginning on page **Error! Bookmark not defined.** of the Prospectus. While we have entered into such transactions on an arm’s length basis and are in compliance with the applicable provisions of Companies Act, 2013 and other applicable law, there is no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. We have secured our lenders by creating a charge over our movable properties, book debts, stocks in respect of loans / facilities availed by us from banks. The total amounts outstanding and payable by us as secured loans were ₹ 1,136.42 Lakhs as on March 31, 2024. Our total outstanding borrowings was ₹ 1,240.81 lakhs and debt to equity ratio was 2.83 as on March 31, 2024. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated from our business, which depends on the payments by our customers. Any default in repayment to the lenders could adversely affect our business, results of operations and financial condition.

If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms.”

43. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

We maintain several insurance policies, including United Bharat Sookshma Udyam Suraksha Policy, New India Bharat Laghu Udyam Suraksha Policy, Star Group Health Insurance Policy, Money Insurance Policy, Machinery Breakdown Insurance Policy, Electronic Equipment Insurance Policy and Commercial and Private Car Policies. While it is believed that the insurance coverage maintained by the company would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by the company will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. If we were to suffer loss or damage resulting from not obtaining or maintaining insurance or exceeding our insurance coverage, the loss would have to be borne by us and it could have a material adverse effect on our results of operations and financial condition.

The happening of such event may cause a material effect on our results of operations and financial position.

45. *Our Promoters have provided personal guarantees for loans availed by our Company. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the invocation of all or any personal guarantees provided by our Promoter.*

Our Promoters and Directors have provided personal guarantees to secure a significant portion of our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Directors may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoters and Directors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Also, if our Promoters and Directors revoke their personal guarantees and we may not be successful in procuring alternate guarantees and property satisfactory to the lenders, as a result we may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer "**Financial Indebtedness**" on page no. 209 of this Prospectus.

Our Trade Receivables for the period ended March 31, 2024, March 31, 2023, March 31, 2022 were ₹ 505.40 lakhs, ₹ 411.93 lakhs and ₹ 447.70 lakhs respectively and our inventories for the period ended March 31, 2024, March 31, 2023, March 31, 2022 were ₹ 761.63 lakhs, ₹ 669.19 lakhs and ₹ 622.47 lakhs respectively.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/ or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. As on date, we have not made any alternate arrangements for meeting our working capital requirements, other than the existing sanctioned limits. We meet our additional working capital requirements through internal accruals. Any shortfall in internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations.

54. *Delays or defaults in payment by our clients could affect our cash flows and may adversely affect our financial condition and operations.*

As of March 31, 2024, we had trade receivables of ₹ 505.40 lakhs, which represented 22.85% of our total assets as of such date. We extend credit to our clients for a certain tenure and at times for a long period of time and for reason concerning the financial health of our customer we may not be able to realize or recover outstanding amounts in part or in full within a pre-determined timeframe. We have and may continue to have high levels of outstanding receivables. Our average outstanding receivable tenure is in the range of 1 to 2 months in the past three financial years. Increased borrowings, if any, would adversely affect our debt-equity ratio and our ability to further borrow at competitive rates. Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements could lead to a termination of one or more of our credit facilities, trigger cross default provisions, penalties and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations. For further details of our indebtedness, please refer to the chapter titled “*Financial Indebtedness*” on page 209 of this Prospectus.

56. *Our debt financing agreements contain certain restrictive covenants that may adversely affect our Company’s business, credit ratings, prospects, results of operations and financial condition.*

A failure to observe the restrictive covenants under our debt financing agreements may result in termination of our financing agreements, levy of default interest, acceleration of all amounts due under such facilities and the enforcement of any security provided in relation thereto. Any acceleration of amounts due under such debt financing agreements may trigger cross-default or cross-acceleration provisions under other debt financing agreements, which may compel us to dedicate a substantial portion of our cash flow from operations or sell certain assets to make such payments thereby reducing the availability of cash for our working capital requirements and other general

corporate purposes. Further, in the event of any of the circumstances coming into effect our business, prospects, results of operations and financial condition may be adversely affected.

Our current debt facilities carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions from time to time, there can be no assurance that these agreements will protect us adequately against interest rate risks.

We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, and our Group Companies in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other company in which our Promoter has interests. There can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

For further details, kindly refer chapter titled "**Group Entities of our Company**" beginning on page no. 176 of this Prospectus.

69. Upon completion of the Issue, our Promoters / Promoter Group may continue to retain significant control, which will allow them to influence the outcome of matters submitted to the shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own 63.33% of the total post issue Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring any strategic decision favourable to the Company or effecting a change in control of our Company for the betterment of the stakeholders.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

70. Within the parameters as mentioned in the chapter titled "Objects of this Issue" beginning on page 82 of this Prospectus, our Company's management will have flexibility in applying the proceeds of this Issue subject to applicable laws. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

We intend to use entire Issue Proceeds towards meeting the working capital requirement and general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2024-25 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled "**Objects of the Issue**" beginning on page 82 of this Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors and shall be subject to applicable laws. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "**Objects of the Issue**" beginning on page 82 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue subject to applicable laws. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorized to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

71. Delays or defaults in client payments could affect our operations.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In the past, there have been some instances of delays and defaults in payments by our customers. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

72. Our revenues are highly dependent on clients located in India. Any decline in the economic health of India could adversely affect our business, financial condition and results of operations.

We majorly sell our products and services to clients located in India. If the economic conditions of India become volatile or uncertain or the conditions in the financial market were to deteriorate, especially in recent times due to the COVID-19 pandemic, or if there are any changes in laws applicable to our services and operations or if any restrictive conditions are imposed on us or our business, the pricing of our services may become less favourable for us. Further, our clients located in these geographies may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions. Any reduction in spending on third party logistic services may lower the demand for our services and negatively affect our revenues and profitability.

73. Industry information included in this prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.

We have relied on the industry reports derived from www.ibef.org for purposes of inclusion of such information in this prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this prospectus.

74. Certain key performance indicators for certain listed industry peers included in this Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.

Pursuant to the requirements of the SEBI ICDR Regulations dated November 21, 2022, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the "**Basis for Issue Price**" beginning on page 90 of the Prospectus. While our business comprises of the PVC Pipe industry, these listed industry peers are related to associate industry. Although this information is sourced from and relied upon on the standalone/consolidated audited financial statements of the relevant listed industry peers for Fiscals 2024 as available on the websites of the Stock Exchanges, including the annual reports of the respective companies for the years ended March 31, 2024 submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete or adequate. There are different methodologies and formulas used to compute the various ratios.

75. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than Rs. 10,000.00 Lakh there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

B. Issue Related Risks

76. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

We have no experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a public listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as a unlisted company. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, our management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

77. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter "*Objects of the Issue*" on page 82 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

78. *There is no guarantee that our Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the Emerge Platform of National Stock Exchange of India Limited within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

79. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

80. *After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.*

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the LM and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;
- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

81. *The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

We have applied to National Stock Exchange of India Limited to use its name as the Stock Exchange in this offer document for listing our shares on the Emerge Platform of National Stock Exchange of India Limited. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

82. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

83. *Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

84. *Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future.*

Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

85. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 180 of this prospectus.

86. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

87. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants’ ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

88. *Foreign investors may be restricted in their ability to purchase or sell Equity Shares.*

Under foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing or reporting requirements and does not fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

89. *The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.*

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

90. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of the Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

91. *Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.*

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

EXTERNAL RISK FACTORS

92. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and

operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

93. *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

94. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "**Key Industry Regulations and Policies**" on page 134 of this Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous

requirements and conditions on our operations. Our Company will comply with relevant regulations as and when applicable. However, any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

95. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

96. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

97. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

98. *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as “systemic risk,” may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

99. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

100. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company’s business could cause its results of operations to suffer. Any significant change in India’s economic policies could disrupt business and economic conditions in India generally and the Company’s business in particular.

101. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023-24 is estimated to be Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%.

Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023-24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 296.58 trillion (US\$ 3.56 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q2 of 2023-24 was Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in 2022-23, estimating a growth of 9.1%. As of 03rd October 2023, India is home to 111 unicorns with a total valuation of US\$ 349.67 Billion. Out of the total number of unicorns, 45 unicorns with a total valuation of US\$ 102.30 Billion were born in 2021 and 22 unicorns with a total valuation of \$ 29.20 Billion were born in 2022. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. The current account deficit stood at US\$ 8.3 billion, or 1% of GDP, in the second quarter of fiscal 2023-24 as compared to US\$ 9.2 billion or 1.1% of GDP in the preceding quarter.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Further, In the interim budget for FY24, Government increased FY25 Capex outlay to record Rs.11.11 lakh crore (US\$ 133.5 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

PLASTIC INDUSTRY OVERVIEW

Introduction

The Indian plastic industry is one of the leading sectors in the country’s economy. The history of the plastic industry in India dates back to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,500 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floor coverings, medical items, packaging items, plastic films, pipes, raw materials, etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics, and tarpaulin. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crore (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crore (US\$ 126 billion) in 4-5 years.

10 Plastic Parks have been approved in the country by The Department of Chemicals and Petrochemicals. Among these, six plastic parks have received final approval from the following states – Madhya Pradesh (two parks), Assam (one park), Tamil Nadu (one park), Odisha (one park), and Jharkhand (one park). These parks are intended to boost employment and attain environmentally sustainable growth.

Export Trend

In FY24 (Until February 2024), India’s plastic exports stood at US\$ 10.43 billion. During this period, the exports of human hair & related products, medical items, plastic pipes and FRP & composites grew by 12.7%, 8.9%, and 13.8%, respectively, over the same period last year.

In February 2024, the exports of Floorcoverings, leathercloth & Laminates witnessed a growth of 19.7%.

The cumulative exports of plastics and related materials during 2022-23 were valued at US\$ 11.96 billion. This was a 10.4% decrease from the 2021-22 exports valued at US\$ 13.35 billion. Plastic raw materials were the largest exported category and constituted 27.76% of the total exports in 2022-23; it recorded a growth of 21.5% over the previous year. Plastic films and sheets were the second largest category, comprising 15.13% of the total exports, but declined by 10.6% over the previous year.

The cumulative exports for April-February 2024 declined by 4.4% year-on-year (YoY) to US\$ 10.43 billion.

Export Destinations

India exports plastic to more than 200 countries in the world. The top five consumer and houseware product importing countries are the USA, Germany Japan, the UK, and France. India largely exports plastic and related products to the USA, China, the UAE, the UK, Germany, Italy, Bangladesh, etc. The total value of exports to the USA, the largest consumer of the Indian plastic industry, stood at US\$ 2.31 billion in 2022-23, a decrease of 4.71% YoY. China was the second largest consumer of plastic export products from India and the total value of exports stood at US\$ 690.95 million. The USA and China constituted 19.37%, and 5.78%, of the total plastic exports in 2022-23.

The total plastic exports from India to France during 2022-23 was around US\$ 211.4 million. In order to boost exports to France and Europe, PLEXCONCIL collaborated with the Indo-French Chamber in the first quarter of 2021-22. The Minister for Commerce and Industry, Mr. Piyush Goyal, recently urged industry to adopt international standards to help it expand its global footprint. India has recently signed a free-trade agreement with UAE and Australia, which will give the plastics industry new opportunities.

Government Initiatives

The Plastic Export Promotion Council (PLEXCONCIL) has set a target to increase the plastic exports of the country to US\$ 25 billion by 2027. There are multiple plastic parks that are being set up in the country in a phased manner that will help improve the plastic manufacturing outputs of the country. Under the plastic park schemes, the Government of India provides funds of up to 50% of the project costs or a ceiling cost of Rs. 40 crore (US\$ 5 million) per project.

Government initiatives like “Digital India”, “Make in India”, and “Skill India” will also boost India’s Plastic industry. For instance, under the “Digital India” program, the government aims to reduce the import dependence on products from other countries, which will lift the local plastic part manufacturers.

The government also launched a program for building Centres of Excellence (CoEs) to develop the existing petrochemical technology and promote the research environment pertaining to the sector in the country. This will aid in promoting and developing new applications of polymers and plastics in the country. Additionally, about 23 Central Institute of Plastics Engineering & Technology (CIPET) have been approved to accelerate financial and technological collaboration for promoting skills in the chemicals and petrochemicals sector.

Governing Body

PLEXCONCIL was established by the Ministry of Commerce and Industry in 1955. The main objective of this non-profit organization is to highlight India as a reliable supplier of high-quality products. PLEXCONCIL is the apex body of the plastics industry in the country and represents more than 2,500 exporters who manufacture and trade plastics products ranging from plastic raw materials to semi-finished and finished items.

MANUFACTURING PROCESS FLOW (uPVC Pipes & Rigid PVC Electrical Conduits)

Raw Material Mixing:

The raw materials for uPVC Pipes and Electrical Conduits are PVC Resin, Calcium carbonate, Wax, PVC Stabilizer, Stearic Acid, Titanium and Carbon. Only proportionate of Stabilizer varies between uPVC Pipes and Electrical Conduits. The raw material are thoroughly mixed in high-speed mixer machines to ensure a uniform blend and loaded in the hooper.

Extrusion:

From the hoopers Raw Material mixer are fed to extruder machine. Inside the extruder, the mixture is heated and pushed through a screw-shaped barrel. This creates friction and heat, melting the Raw Material mixer and forcing it towards the die.

Die Shaping:

The molten PVC reaches the die, which has a hollow, circular shape. The molten plastic flows through this hollow space, taking the shape of the pipe.

Sizing and Calibration:

The newly formed pipe exits the die and enters a sizing or calibration device. This device ensures the pipe has the exact desired diameter and wall thickness.

Cooling:

The hot pipe is then submerged in a cooling bath, typically filled with water. This rapidly cools the pipe, solidifying it and setting its shape.

Printing:

While passing the pipe from cooling bath to haul off, desired product information is printed on the pipe using automated ink jet printers.

Haul-off and Cutting:

A puller, called a haul-off, continuously removes the solidified pipe from the cooling bath. Finally, the pipe is cut to specific lengths or coiled depending on the end application.

Online Socketing:

Online socketing refers to a technique used in plastic extrusion, specifically PVC pipe extrusion, to create bell-shaped ends

PROPOSED ENHANCEMENT

Rigid PVC Electrical Conduits:

Considering the growing demand of Rigid PVC Electrical Conduits in the regional markets, the company is proposing to enhance the plant capacity of Electrical Conduits from 2760 MT (27,60,000 Kgs) Per Annum to 4860 MT (48,60,000 Kgs) Per Annum situated at our existing facility situated at Unit – 4 i.e. 3/12/82 & 83, Karkuddy, Therkkumedu, Kesavapuram, Shencottah, Tirunelveli – 627813, Tamil Nadu.

HDPE (High-Density polyethylene) Pipes:

High-density polyethylene (HDPE) pipes are a popular choice for a variety of plumbing and industrial applications due to their numerous advantages over traditional materials like metal pipes. Considering the increasing demand of HDPE Pipes, the company is proposing to augment its product portfolio by implementing manufacturing facility of HDPE Pipes of 2160 MT (21,60,000 Kgs) per Annum at our existing manufacturing facility situated at Unit – 2 i.e. TP/XIII/707&708, Papannoor Road, Edamon, Kollam – 691307, Kerala, India.

The overall Project cost for the proposed expansion project has been estimated at ₹ 552.64 lakhs.

Advantages of HDPE (High-Density polyethylene) Pipes:

- **Corrosion resistance:** Unlike metal pipes that are susceptible to rust and corrosion, HDPE pipes are inert and highly resistant to a wide range of chemicals, including acids, bases, and salts. This makes them ideal for use in underground installations, where they are less likely to be damaged by soil conditions.
- **Durability:** HDPE pipes are very strong and durable, with a long lifespan that can exceed 50 years. They are also resistant to impact and abrasion, making them less likely to crack or break.
- **Leak-proof joints:** HDPE pipes can be joined together using heat fusion, which creates a strong, permanent bond that is virtually leak-proof. This eliminates the need for solvents or glues, which can degrade over time and lead to leaks.
- **Flexibility:** HDPE pipes are flexible, which allows them to be easily bent around obstacles and uneven terrain. This can significantly reduce the number of fittings required for an installation, saving time and money.
- **Lightweight:** HDPE pipes are much lighter than metal pipes, making them easier to transport and handle. This can also lead to lower installation costs.
- **Smooth interior:** The smooth interior surface of HDPE pipes reduces friction loss, which means that less energy is required to pump fluids through the pipes. This can result in significant cost savings over time.
- **Environmentally friendly:** HDPE pipes are recyclable and can be used to create new HDPE products at the end of their lifespan. They are also non-toxic and do not leach harmful chemicals into the soil or water.
- **Cheaper than PVC:** Compared to PVC pipes, Operational Wise/Material wise Raw Material cost is cheaper than PVC.
- **Fittings Not Required for HDPE:** Like PVC pipes, HDPE does not require Fittings for installation, they are installed through welding process. It's comparatively cost-effective method.
- **Used in Both Plumbing & Electrical Applications:** Compared to PVC, HDPE Pipes are flexible, so they are using for long line pipe & cables installation, it helps from the breakage for conduit in underground.

ENVIRONMENT RELATED LAWS

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance
- Enhancement of resources for Environmental Conservation

Total Revenue

The total revenue for FY 2023-24 was decreased to ₹ 4715.73 Lakhs as against ₹ 6225.43 Lakhs in the FY 2022-23 primarily due to decrease in revenue from operations of the Company.

Revenue from Operations: The revenue from operations of the company for FY 2023-24 was decreased to ₹ 4619.13 Lakhs as against ₹ 6077.17 Lakhs in the FY 2022-23. This decrease was mainly due to the following reasons:

Reason for decrease in Turnover: Sales turnover has decreased by approx. 24% ((From ₹ 6077.17 lakhs in FY 2022-23 to ₹ 4619.13 lakhs in FY 2023-24). The decrease in sales is mainly due to decrease in volume by approx. 13% and also decrease in price by approx. 13%.

PVC Industry has faced lot of challenges during the year lacking demand. Prices of PVC Resin (Major raw material for PVC Pipes) has moved down to approx. ₹ 73/- per kg in October 2023 from the peak of approx. ₹ 142/- per kg in April 2022. Average purchase price of Resin stood at approx. ₹ 80/- per kg during the current year against approx. ₹ 99/- per kg for the previous year resulting a drop of approx. 19% in purchase price.

PVC Pipe and construction industry faced a slowdown in Indian market. PVC Pipe prices are governed by the price fluctuation of PVC resin and resultantly the prices of PVC pipes were also decreased. This caused a reduction in sales value. Even though the turnover has been dropped but we could maintain a better profitability compared to previous year.

Reason for Loss in FY 2021-22: The Company has incurred Profit before Tax (PBT) of ₹ (52.91) lakhs and Profit after Tax (PAT) of ₹ (40.71) during FY 2021-22. Major reasons for this loss are

- The Company acquired a factory in KINFRA Park at Kannur in 2018-19 and set up Kannur plant during FY 2019-20 which went into full-fledged commercial operation in the year 2022-23 due to the pandemic situation of Covid-19. During the FY 2020-21 & FY 2021-22, the company incurred additional depreciation, interest cost and operational cost with respect to Kannur Factory against which revenue from said factory had not been generated.
- During the above period, raw material (PVC Resin) prices were fluctuated exorbitantly. The company were not able to pass on the increase in raw material price to the market due to the frequent changes in PVC Resin price and competition pricing. This resulted in increased Raw Material Cost and lower margin.
- Moreover, the pandemic Covid situation forced for shut downs and lower sales volume resulted in lower profitability.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

This Issue is mandatorily being made under Phase III of the UPI Mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as the Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 as amended pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“UPI Streamlining Circular”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the Lead Manager, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Lead Manager. RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
